## Contents

A note to the reader  
Preface  
Introduction  

### Part I: Introducing consciousness

1. As sweet by any other name? Consciousness, self-consciousness and conscience  
   - Introduction  
   - The history of ‘conscience’ – and her cousins  
   - ‘What do you mean by. . .?’  
     - Consciousness  
     - Self-consciousness  
     - Conscience  
     - A note on awareness  
   - Consciousness in other tongues  
   - Consciousness in prospect  
2. ‘The nerves in the brain, oh damn’em’: a sketch of the human nervous system  
   - Introduction  
   - The simple nervous system  
     - Cells  
     - Neurons  
     - Neuronal neighbours  
     - Interconnections  
     - Simplicity embodied  
   - The complex nervous system  
     - Neurons – and their networks  
     - Interconnections redrawn  
   - Conclusion: the nerves in the brain  

### Part II: The capacity for consciousness

3. The springs of awareness: the structural basis of consciousness (i)  
   - Introduction  
   - The electricity of the brain  
     - On the electroencephalogram of man  
     - The EEG today  
     - The patterning of conscious states  
     - Cognitive potentials  
   - Controlling consciousness  
     - Epidemic stupor  
     - A wonderful net  
     - The chemistry of consciousness  
     - The place where consciousness dwells  
   - Why do we sleep?  
   - Conclusion: the conditions for awareness  

---

*Page numbers are approximate and may vary.*
4 The brothers of death: pathologies of consciousness 111
   Introduction 111
   Faints, fits and funny turns
     Faints 112 • Fits 117 • Funny turns 123
   Opium, alcohol and other anaesthetics
     Opium 124 • Alcohol and other anaesthetics 126
   Awareness under anaesthesia 130
   Varieties of coma 132
   Hysteria and trance 135
   Did you have a good night?
     Insomnia 138 • Hypersomnia 140 • Parasomnia 142
   The measurement of awareness 144
   Conclusion: anatomising consciousness 149

Part III: The contents of consciousness

5 From darkness into light: the structural basis of consciousness (ii) 153
   Introduction 155
   Light and the evolution of vision
     Light 156 • Light and life 157 • Life and vision 158
   The retina: sensitive pigment
     Capturing quanta 163 • Communicating contrast 166
   Analysis and integration: the cortical visual areas
     En route to the visual cortex 168 • Area 17 169 • Multiple maps 172
   Seeing things
     The wood from the trees 175 • Binding 178 • Constancy 179
     Recognition 181 • Imagination 183 • The roving eye 184
   Paying attention: did you see the gorilla? 186
   The beholder’s share 190
   Invisible destinations 192
   Conclusion: image and action 196

6 ‘I cannot see you Charley, I am blind’: clear-sighted blindness and blindsight 197
   Introduction 197
   The famished eye
     Molyneux’s question 199 • The ripening of vision 201 • Novel sensations 206
   Mindblindness: the agnosias
     Apperceptive agnosia 209 • Associative agnosia 213
   Neglect 221
   blindsight
     The absence of all sensation 224 • The sound of distant gunfire 228
     Why is blindsight blind? 229
   Hallucination: ‘There’s a seagull on your shoulder’ 230
   Exquisite correlations 233
   Conjuring the rainbow 236
   Conclusion: vision and consciousness 238
