 **Against the Grain***A Deep History of the Earliest States*

JAMES C. SCOTT

This landmark book explores the transition of early hunting-and-gathering societies into agricultural societies. By condensing today's best archeological and historical knowledge about early state formation and domestication, Scott creates a new picture of how and why humans came to live in the great heaps of plants, animals, and microbes characteristic of agrarian state societies.

JAMES C. SCOTT

James C. Scott places the critical problem of the peasant household—subsistence—at the center of this study. The fear of food shortages, he argues persuasively, explains many otherwise puzzling technical, social, and moral arrangements in peasant society, such as resistance to innovation, the desire to own land even at some cost in terms of income, relationships with other people, and relationships with institutions, including the state.

Scott analyzes diverse failures in high-modernist, authoritarian state planning—collectivization in Russia, the building of Brasilia, compulsory *ujamaa* villages in Tanzania, and others—and uncovers conditions common to all such planning disasters. What these failures teach us, he argues, is that any centrally managed social plan must recognize the importance of local customs and practical knowledge if it hopes to succeed.

Origins of Order

Project and System in the American Legal Imagination

PAUL W. KAHN

Kahn examines the two master narratives of order: project and system. Order is imagined as the product of an intention or as immanent in the world. He explains the nature and origins of these ideas, and then shows how they have produced two different approaches to law.
